**PLAINTIFFS' JOINT REPLY APPENDIX (Vol. IV of IV)
IN SUPPORT OF PLAINTIFFS' REPLY TO DEFENDANT'S RESPONSE TO
PLAINTIFFS' MOTION FOR PRELIMINARY INJUNCTION**

PLAINTIFFS' JOINT REPLY APPENDIX
Vol. IV of IV
(pp. 2024-2098)

Per the Court's Order of November 7, 2018, Plaintiffs in each of the four above-entitled actions hereby submit their unitary Joint Reply Appendix consisting exclusively of evidentiary documents upon which some or all of the Plaintiffs may choose to rely in their Reply to Defendant's Response to Plaintiffs' Motion for Preliminary Injunction. The inclusion of documents in this Joint Reply Appendix does not automatically signify an endorsement or promotion of any of these documents by any individual Plaintiff or group of Plaintiffs. That will depend on specific adoption of any of these documents by any Plaintiffs or Group of Plaintiffs in documents they may file with the Court.

The reference below to the "Club Plaintiffs" refers to all the Plaintiffs in Action Nos. 02 CV 4431, 02 CV 4432 and 02 CV 8333. The reference below to the "Bookstore Plaintiffs" refers to all the Plaintiffs in Action No. 18 CV 3732.

(12) Block 1095, Lot 11 (City's Count # 38), 620 Joe DiMaggio Highway:

Block: 1095, Lot: 11

**THE MAXIMUM THEORETICAL NUMBER OF LOTS FOR
RELOCATING ADULT BUSINESSES IN MANHATTAN**

8. In my Sites Declaration, I concluded that only 16 new or relocating adult businesses could theoretically be established in Manhattan and graphically illustrated the locations of those areas in a map identified as Exhibit 1-K to that declaration, found at p. 0030 of Plaintiffs' Joint Appendix. After eliminating the 58 lots rejected by the City, and determining that only one of the City's 12 additional lots is both legally permissible and unencumbered (i.e., Block 705, Lot 1), I now conclude that 1) there are only 28 legally permissible lots in Manhattan which are suitable and potentially available for typical generic commercial uses and 2) of those 28 lots, because of the required 500' buffer between adult businesses, only 9 adult businesses could, even theoretically, *simultaneously* relocate in Manhattan. The attached map (Plaintiffs' Exhibit 1-K (Amended)) shows the location of the 9 areas where these lots are found. They are limited to the areas shown thereon within circles. The colored areas outside the circles are areas shown as permissible on my prior map 1-K, but which we and the City now agree are either not legally permissible or otherwise constitutionally countable due to encumbrances, etc.

9. In contrast, Ms. Laremont, in the final sentence on p. 10 of her declaration, states that "up to 13 adult establishments could simultaneously relocate in Manhattan." Ms. Laremont does not indicate how she arrived at this number or where these 13 simultaneously permissible lots or areas would be located.

AVAILABILITY TO ADULT USES

10. Based on my extensive experience in assisting clients to find and open adult businesses, I have a good understanding of which types of sites are reasonable possibilities for acquisition and development by an adult business. In my opinion, not a single one of the additional 12 lots which the City contended to be both legally permissible and unencumbered for

use by some type of commercial use would ever be a potentially viable option for, and/or available or acceptable to, any adult business client, either because they are in fact *not* legally permissible or, for any which *are* legally permissible, there is either no realistic possibility 1) that they would be rented to an adult tenant or 2) that they would be perceived by relocating businesses owners as locations which could successfully be operated as a viable adult eating and drinking establishment.

11. For example, six of the City's proposed 12 lots (described above in paragraphs 7-(3), (4), (5), (6), (7) and (8)) are in the Hudson Yards Development. This development, though privately owned, was built with substantial City subsidies. I have read the attached article from the New York Times dated March 10, 2019¹ (Exhibit 89 hereto), and it both accurately describes the municipal subsidies, as well as indicating the limited types of uses for which it was primarily designed, e.g., residential uses, a school, dedicated open spaces, and *very* high-end commercial uses. In my opinion, it is not realistic to conclude that any area in the Hudson Yards would become available to any adult use in the foreseeable future.

12. Moreover, large portions of the Hudson Yards, and particularly in the Western Yards where the City has posited the existence of multiple potential adult sites, are in the earliest stages of construction and will not be available to anyone for years.

13. I have personally reviewed all of the 28 lots in Manhattan which Plaintiffs and the City agree are legally permissible and unencumbered, and, based on my several decades of experience as an architect assisting clients in locating, remodeling and obtaining permits for adult business in Manhattan, it is my opinion that within those few 28 legally permissible and

¹ This article was found at <https://www.nytimes.com/2019/03/09/nyregion/hudson-yards-new-york-tax-breaks.html>

unencumbered lots, only the following three lots are commercially feasible for establishment of a new or relocating adult eating and drinking establishment, and none are currently available:

- **Block 1089, Lot 1**
- **Block 1090, Lot 7501**
- **Block 645, Lot 29.**

THE CITY'S CLAIMED OUTER BOROUGH LOTS

14. Because the City has not provided the block and lot numbers of any of the individual legally permissible lots it claims are available in the outer boroughs, nor the location of the existing adult businesses or schools or houses of worship, if any, which it considered in determining whether a lot was legally permissible for an adult use, it is impossible for me to evaluate its conclusion regarding the number of potential lots which exist City-wide.

15. Additionally, I observed, when creating our original maps 1-A, 2-A, 3-A, 4-A and 5-A (one for each of the five boroughs) from the City's original 1995 maps, that the City's 1995 maps for each of the boroughs *expressly stated* that they did *not* take into account *any* existing adult business sites which would have then eliminated all lots within a 500' radius. (This is shown in a microscopic footnote at the top of each such map, as presented in the Bookstore Plaintiffs' Judicial Notice Exhibit 76 (PJA 1810-1815.) Consequently, I conclude that those maps showed many more sites as being legally permissible for adult businesses than there were.

16. Moreover, because, in the preparation of my current Manhattan maps I found, just in Manhattan alone, that there were at least 106 houses of worship or schools not factored in on the City's 1995 Manhattan map, I question whether City officials in 1995 accurately gauged and considered the disqualifying impact of these "sensitive uses" either in Manhattan or any of the five boroughs.

17. I have reviewed the City's *current* maps of the outer boroughs and they do not indicate that the City factored in either the sensitive uses or existing adult uses in creating its maps for any of the outer boroughs.

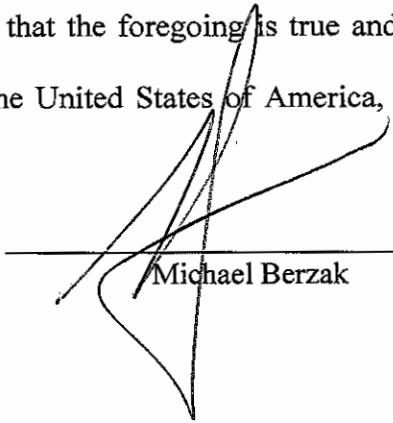

18. Equally, if not even *far* more significant though, neither the City's current maps nor its current estimate of permissible lots appear to show or take into account the number of areas where new adult businesses can be established *simultaneously*. Since the presence of an adult business on any lot would eliminate all locations in any direction within 500' of its front door for use by another adult business, it is the number of lots which could be used *simultaneously* which is the only relevant inquiry.

19. Accordingly, based on the charts and maps submitted by the City, I cannot determine, and frankly have no idea of, the number of lots in the outer boroughs which could be used *simultaneously* by new or relocating adult entertainment businesses.

20. Nonetheless, I note from a statement in footnote 16 of the City's Amended Memorandum of Law filed herein on February 1, 2019, that in litigation over the original 1995 adult business ordinance, the City pointed out that plaintiffs therein acknowledged that there were then 78 potential legally permissible relocation lots in Manhattan. Since the City is now contending that currently only "13 adult establishments could simultaneously relocate in Manhattan" (Laremont Dec. at p. 10, last sentence), this indicates that the number of lots for adult businesses has been potentially reduced *sixfold* in Manhattan since 1995, and suggests that the same (or more) might well be equally true Citywide! But again, without knowing the exact locations of the asserted lots, and of all the surrounding sensitive uses and adult businesses, it is impossible to even estimate, much less determine, the number of adult businesses which the zoning law would simultaneously allow City-wide today. Only after determining the number

and location of such lots could I ascertain whether they would be commercially feasible for, or even available to, such businesses and, if so, how many.

I declare under penalty of perjury that the foregoing is true and correct. Executed this 15 day of March, 2019, within the United States of America, at New York, New York.

Michael Berzak

The New York Times

Amazon's Tax Breaks and Incentives Were Big. Hudson Yards' Are Bigger.

By **Matthew Haag**

March 9, 2019

[What you need to know to start the day: Get New York Today in your inbox.]

At Hudson Yards, the expansive real estate development that is about to open in Manhattan, seven floors of retail are occupied by Fendi, Dior, Neiman Marcus and other high-end shops. Major corporations, including WarnerMedia and L'Oreal USA, will have their headquarters there. In the luxury residential buildings, one-bedroom apartments will rent for at least \$5,200 a month — or you can buy a two-floor penthouse condo for \$32 million.

All thanks to the help of taxpayers.

New York was riveted for weeks by a debate over whether Amazon should receive \$3 billion in tax breaks and other incentives in return for setting up a headquarters in Queens and creating 25,000 jobs. But with far less public attention, the city government has for more than a decade been funneling even more aid to Hudson Yards, a 28-acre complex of gleaming office buildings and luxury residential towers that is one of the nation's biggest real estate projects in recent years.

In all, the tax breaks and other government assistance for Hudson Yards have reached nearly \$6 billion, according to public records and a recent analysis by the New School.

The city spent about \$2.4 billion to extend the No. 7 subway line to Hudson Yards and set aside \$1.2 billion for about four acres of parks and open spaces called Hudson Park and Boulevard. The City Council stepped up to pay \$359 million in interest payments on bonds when revenue from the development, which was supposed to cover the tab, fell short of projections.

As a result, Hudson Yards is perhaps an even more resonant symbol of the role of government in giving tax breaks and other incentives to spur development. In this case, two of the world's largest real estate developers, Related Companies and Oxford Properties Group, which together built Hudson Yards, have significantly benefited.

Supporters of the Hudson Yards project say the government incentives will pay vast dividends by creating an entirely new business district, generating thousands of new jobs and retaining many thousands more. They point out that the No. 7 subway extension, the parks and other

improvements that the city financed will help make the Far West Side an overall better neighborhood.

SUBSCRIBE TO THE TIMES

But the project's detractors voice the kind of criticism that reverberated during the Amazon deal: Wealthy businesses, no matter their promises of jobs, should pay their own way and not demand government incentives to undertake projects. (Stung by the backlash over the incentives that it would receive, Amazon last month abandoned its plans for its campus in Long Island City.)

The opponents are focused in particular on a lengthy and lucrative property tax break for developers within the broader Hudson Yards area. So far, the cost of that tax break has surpassed \$1 billion, according to the recent analysis by Bridget Fisher and Flávia Leite at the New School.

The Vessel is the climbable sculptural centerpiece of the Hudson Yards development, which is estimated to add \$19 billion to the city's economy every year. Stephanie Keith/Getty Images

Future properties in Hudson Yards can also take advantage of the tax break, which can be as much as a 40 percent discount and last about 20 years. The opponents said such incentives inevitably end up widening income inequality in a city like New York.

“We are still giving tax breaks to a development that enriches billionaire developers and high-rise commercial and residential development that is not benefiting ordinary people in New York,” said James Parrott, director of economic and fiscal policies at the Center for New York City Affairs at the New School.

There are other incentives as well.

BlackRock, the world’s largest money manager, which ended 2018 with \$5.98 trillion under management, can obtain \$25 million in state tax credits if it adds 700 jobs at Hudson Yards. L’Oreal USA is in line for \$5.5 million for the same discretionary tax credit, while WarnerMedia can get \$14 million.

Even Mayor Bill de Blasio, a supporter of the Hudson Yards project, is now expressing some misgivings about the property tax breaks. Mr. de Blasio had been a backer of the Amazon deal, but since the company pulled out, he has abruptly shifted tone, just as he has been seeking to solidify his credentials with progressives.

Mr. de Blasio said in a statement that the subway and park spending had broad benefits, but added: “We’ve moved away from providing discretionary incentives like the prior administration. I believe state and local economic development programs need to be re-evaluated and updated.”

Hudson Yards sprouted during a moment of post-September 11 pride and economic uncertainty, with the mayor at the time, Michael R. Bloomberg, vowing to reclaim a neighborhood that included a stubby collection of brick warehouses, factories and tenements built when the Hudson River docks were busy. In the middle was an unsightly rail yard.

On Friday, when Hudson Yards officially opens, a city within a city will rise as the centerpiece of an area bounded by Eighth and 12th Avenues from 30th to 42nd Streets. The main site, developed by Related Companies and Oxford Properties, was built over the rail yard, and it is by some estimates the largest real estate project in New York since Rockefeller Center in the 1930s.

The \$25 billion neighborhood has 13 buildings, including a school and parks, that will bring more than 55,000 employees to new offices there. There will also be a major dining complex with restaurants run by celebrity chefs like Thomas Keller and David Chang.

A view atop 30 Hudson Yards, a 1,296-foot-tall office building at the site, which was built over a rail yard.
Tony Cenicola/The New York Times

“Without a doubt, we now have millions of square feet of office space and housing we did not have,” said Alexander Garvin, a former commissioner on the New York City Planning Commission, who became involved with Hudson Yards in the mid-1990s. “We have that many more jobs, that many more places for people to live, and that much more property taxes that come into the city.”

(The Related Companies chairman, Stephen M. Ross, a 78-year-old billionaire who is one of the world’s richest people, is moving into a penthouse in the 72-story tower, which is known as 35 Hudson Yards.)

L. Jay Cross, president of Related Hudson Yards, which oversees the development of the site, said in an interview that the redevelopment would not have gotten off the ground without the subway extension and tax breaks that allowed for new office space to be offered at rates comparable to Midtown’s.

Mr. Cross said it was vital that the city throw its support behind major development projects to ensure that it remained attractive to businesses in an increasingly globalized economy.

“With all those old buildings we have in aging Midtown, we have to find a way to build modern buildings to compete with London, Singapore and Tokyo,” he said.

Mr. Cross said that as Hudson Yards grows, the city would take in more in property taxes that it could use to pay off the bonds that financed the subway extension.

The groundwork for Hudson Yards was set in motion in the 1980s. When the Metropolitan Transportation Authority created a yard for commuter trains on the West Side, its chairman at the time, Richard Ravitch, knew the site could be valuable one day. He had the tracks spaced far enough apart that columns could be installed to support a deck.

A decade later, the property became the centerpiece for an ambitious plan by a young investor named Daniel L. Doctoroff to attract the 2012 Summer Olympics to New York. The rail yard could be covered and support an Olympics stadium, which could also be the new home for the New York Jets.

The Shed, an arts and culture center on the 30th Street side of Hudson Yards, will offer interdisciplinary programming similar to that of the Lincoln Center on the Upper West Side. Tony Cenicola/The New York Times

While the city debated the merits of hosting the Olympics and the economic impact of a stadium, Mr. Doctoroff, who became a deputy mayor under Mr. Bloomberg, and other city planners moved ahead with the broader redevelopment of the West Side.

The area was rezoned, making room for towering buildings, and Mr. Bloomberg committed to the city to expanding the subway when the M.T.A. said it would not.

“There wasn’t any genuine opposition to Hudson Yards at all,” said Peter J. Kiernan, a lawyer who helped write a 2007 study on the city’s finance plan for the subway extension.

By the time New York lost the Olympics bid to London in 2005, the Far West Side was well along into becoming Hudson Yards. New apartment buildings were going up, and subway construction was about to start. In 2008, Mr. Ross swooped in to pay \$1 billion to the M.T.A. to develop a project over the rail yards, salvaging a deal after the first-place bidder backed out.

Hudson Yards would not exist in its current form without significant government assistance, especially the expansion of the 7 line, said Mr. Ravitch, who was initially skeptical of the city’s plan to pay for the subway expansion.

“The M.T.A. didn’t have the money, and it wasn’t a priority,” Mr. Ravitch said last week. “Thank God it turned out to be a great success. It was worth what the city did for it.”

Still, the fallout from the Amazon deal may be having an impact on how the city approaches megaprojects in the future.

Councilman Brad Lander of Brooklyn, a Democrat who is a founder of the Council’s Progressive Caucus, said it was smart to expand the No. 7 subway and create parks on the West Side.

But tax breaks for specific companies are a different story, said Mr. Lander, who was an opponent of the Amazon deal.

“We’re giving away tax breaks without paying close attention to what’s a good deal or not a good deal,” he said.

A version of this article appears in print on March 9, 2019 of the New York edition with the headline: Deal for Amazon Pales Against Aid To Hudson Yards

I, ELLIOTT D. SCLAR, Ph.D., hereby declare pursuant to 28 U.S.C. § 1746:

1. I am Emeritus Professor of Urban Planning at Columbia University where I direct the Center for Sustainable Urban Development at the University’s Earth Institute. I have been a member of the Columbia University faculty since 1978.

2. I submit this declaration in further support of the Plaintiffs’ motion for a preliminary injunction against enforcement of Text Amendment N 010508 ZRY of the Zoning Resolution of the City of New York (the “2001 Resolution”), and in response to the Declaration of Anita Laremont, dated January 30, 2019. This declaration is based upon personal knowledge, research, analysis, and my review of documents pertinent to this proceeding. Ms. Laremont states a number of things in her Declaration, which I believe need to be addressed and corrected.

All Bookstores -- Including Adult Bookstores -- are Barred from M2 and M3 Zoning Districts

3. The City indicates, for the very first time, that the prohibition against bookstores in M2 and M3 districts does not apply to adult bookstores. Laremont Decl. at 6, fn.1.

4. This is in direct conflict with the sworn affidavit of David Karnovsky, former Counsel to the Department of City Planning (“DCP”), dated October 2002. Mr. Karnovsky expressly stated that “[b]ookstores are not permitted in M2 and M3 zoning districts,” citing Z.R. § 42-13 (PJA.1861).

5. Mr. Karnovsky then differentiated between bookstores which do not have booths and book/video stores which include one or more peep booths (PJA.1861). Mr. Karnovsky noted that, under the 2001 Resolution and its predecessor from 1995, a bookstore with booths is “classified as an adult theater.” And, as such, they are permitted in M2 and M3 districts in the same way that other theaters are allowed. Id.

6. This is significant because it confirms that, in enacting the 2001 Resolution, the City recognized that adult businesses are still subject to the Use Group and zoning requirements of other businesses with similar functional characteristics.

7. Put another way, a bookstore is still a bookstore for purpose of determining its Use Group even though it has a greater variety of adult titles than non-adult titles. Similarly, there is nothing in the Zoning Resolution that changes the designation of a bookstore from Use Group 6 to another use group based upon where the cash register is located within the bookstore.¹

8. There is nothing in the 2001 Resolution, or anywhere else in the Zoning Resolution, that defines an “adult establishment” as a different type of Use Group. To the contrary, Z.R. § 42-00, entitled “General Provisions,” provides that “[i]n order to carry out the purposes and provisions of this Resolution, the ‘uses’ of ‘buildings or other structures’ and the open ‘uses’ of ‘zoning lots’, or portions thereof, have been classified into Use Groups.” Z.R. § 42-00 further provides that any “‘use’ which is also an ‘adult establishment’ shall, in addition [to the rules governing Use Groups], be subject to” the special provisions for adult establishments.

¹ Under the 2001 Resolution, a bookstore that has any adult books, magazines, or videos (even if well less than 40% of the floorspace or stock) is considered to be an adult establishment if its “method of operation” requires customers to pay for non-adult material in an area containing any adult material, or if the bookstore has a “greater number of different titles” of adult material than non-adult material. The same is true if the bookstore excludes minors from the store. Z.R. § 12-10.

9. Section 42-01, entitled “Special Provisions for Adult Establishments,” reconfirms that “[i]n addition to the applicable regulations for the ‘uses’ listed in a permitted Use Group, ‘adult establishments’ shall be subject to the following provisions”, which then lists areas where adult establishments are not permitted.

10. As implicitly acknowledged by Mr. Karnovsky, bookstores, as a type of use, are not permitted within M2 and M3, regardless of whether they have any adult content. This is because a bookstore with some erotica is still subject to the same applicable regulations for bookstores that do not have adult material.

11. On the other hand, bookstores that have peep booths are defined within Section 12-10 of the Zoning Resolution as “adult theaters.” And, as such, Mr. Karnovsky believed that they should be treated like other theaters, which, based upon their type of use, are permitted in M2 and M3 districts (PJA.1861).

12. The City now claims that “at the time Karnovsky was not focused on the fact that adult bookstores are distinct uses from bookstores which are not allowed in these districts.” Laremont Decl. at 6, fn.1. However, Mr. Karnovsky made a clear distinction between two types of uses: Bookstores

and theaters. This undermines any claim that he was not “focused” on types of uses.

13. Mr. Karnovsky’s judgment is further confirmed by the Department of City Planning’s Adult Entertainment Study (the “DCP Study”), conducted back in 1994, which formed part of the legislative history underlying the original adult zoning resolution. The DCP Study indicates that “[b]ookstores are not allowed in C3 Districts, and in M2 (Medium Manufacturing) and M3 (Heavy Manufacturing) Districts” (PJA.1874).

14. The distinction between bookstores and other types of adult uses is also evidenced by the maps of permissible areas generated by the City to support the 1995 Resolution. Those maps differentiate M1 districts, in which bookstores may be located, from M2 and M3 districts, where bookstores are not allowed. The City’s maps, located at PJA.1540-1544, indicate M1 districts in light purple, while M2 and M3 districts are shown in dark purple.

15. In marked contrast, the maps annexed to Ms. Laremont’s declaration now, for the first time, do not differentiate between the distinct types of Manufacturing zones. See Laremont Decl.; Dkt No. 51-4.

16. Ms. Laremont states that “Sclar’s argument that bookstores with booths must be classified as theaters, and subjected to the locational restrictions governing theater use is in error.” Laremont Decl. at 6, fn.1. She reasons that “[a]s bookstores with booths are recognized as adult bookstores in the Zoning Resolution, they are explicitly subjected to the locational restrictions governing adult establishments.” Id.

17. However, this is a fundamental misinterpretation of my argument at PJA.1502-07. I never said that bookstores with booths must be classified as theaters. To the contrary, I was disputing Mr. Karnovsky’s belief that bookstores with booths are, for zoning purposes, transformed into theaters that are allowed within M2 and M3 zones (PJA.1503).

18. I recognize that all forms of adult establishments are subject to the locational restrictions governing adult establishments set forth in Z.R. § 32-01 and § 42-01. See PJA.1477.

19. My argument is, instead, that in addition to the locational restrictions governing adult establishments, bookstores are subject to the extra limitations of the Zoning Resolution on specific types of uses. And, as such, the current amount of permissible areas for adult bookstores is markedly less

than the 2.8 percent of total land area claimed by the City. See Laremont Decl. at 8, fn.7.

20. The City has not indicated what percentage of the permissible areas is available citywide after excluding M2 and M3 districts. Upon information and belief, based upon my review of the City's maps from 1995, and my knowledge of zoning in New York City, a larger percentage of the permissible areas in the other boroughs is within M2 and M3 districts.

21. Eleven of the 39 Manhattan lots identified by the City as permissible for adult establishments are located in M2 or M3 districts: Pier 78 (Block 665, Lots 11 and 111), 601 West 26th Street, 261 11th Avenue, 571 11th Avenue, 633 West 44th Street, 638 West 47th Street, 639 West 46th Street, 629 West 46th Street, 620 Joe DiMaggio Highway, and 660 12th Avenue. See Department of City Planning maps of the individual permissible lots in Manhattan, attached hereto as Exhibit 13.

**The City's Maps of Permissible Areas in the
Other Boroughs are Deceptive**

22. The City's 1995 maps indicated, in pink and purple, the permissible areas for adult establishments. See PJA.1540-1544. The maps also indicate, in yellow/mustard, encumbered areas (such as government owned property) that the City acknowledged were not realistically available for adult business (PJA.1824).

23. The City's recent maps use the same colors -- pink and purple -- as well to show where adult establishments are now permitted. See Dkt No. 51-4. However, the City has used pink to show the actual permissible areas and purple to show encumbered areas (lots that are publicly owned and/or have transportation/utility land uses). The City's recent use of the same color scheme from 1995 creates maps that visually misrepresents, as substantially greater than it actually is, the amount of permissible area.

Coastal Erosion, Flooding, and Climate Change are Reducing the Amount of Permissible Areas, and Should be Taken into Account in Assessing Alternative Avenues for Expression

24. Virtually all of the other borough permissible areas indicated in the City's maps, and the permissible lots in Manhattan (Dkt No. 51-2 and 51-4), are located on the coastline.

25. Nevertheless, Ms. Laremont indicates that in evaluating permissible areas for adult establishments, the Department of City Planning "did not exclude from its analysis coastal areas; although the Sclar Declaration refers to coastline changes due to erosion and Superstorm Sandy." Laremont Decl. ¶ 11. She indicates that the "New York City shoreline materially remains unchanged since 2002, and does not affect the areas available for adult establishments." Id.

26. However, the City's shoreline is substantially affected by erosion, climate change, and increased flood risks. A hazard report issued by the City in 2014, reveals that "[e]rosion has already diminished portions of New York City's 520-mile coastline" (PJA.1747). Moreover, "approximately 1,428 acres and roughly 135 buildings and other structures" are located within Coastal Erosion Hazard Areas (PJA.1749).

27. The “NYC Flood Hazard Mapper” maintained by the City’s Department of City Planning provides a “comprehensive overview of the coastal flood hazards that threaten the city today, as well as how these hazards are likely to increase in the future with climate change.” As indicated by the DCP, “[a]s a city with 520 miles of waterfront and many low-lying neighborhoods, New York City is highly vulnerable to flooding. With climate change, flood risks are projected to increase throughout the city over time. However, given the city’s diverse topography, especially along the coast, different neighborhoods will be affected in different ways.”²

28. In 2017, the City created Special Coastal Risk Districts to “address coastal areas that are currently at exceptional risk from flooding and may face greater risk in the future. The Special Districts places limits on new development in these highly vulnerable areas” (PJA.1723).

29. Attached, as Exhibit 14, is a map generated by the Department of City Planning depicting current general citywide floodplain data. These areas subsume virtually all of the more limited areas indicated by the City as permissible for adult use in Manhattan and the other boroughs. See Dkt No.

² See <http://dcp.maps.arcgis.com/apps/webappviewer/index.html?id=1c37d271fba14163bbb520517153d6d5> (visited March 11, 2019).

51-2 and 51-4. Indeed, virtually all of the Manhattan lots indicated by the City as permissible for adult business (Dkt No. 51-2) are located within the floodplain.

30. Attached, as Exhibit 13, are maps indicating, in blue, the floodplain information (effective flood insurance rate maps for 2007 and 2015) and coastal zone boundary. These are areas with high levels of flood risk. The City's maps indicate in light blue the "A Zones." The City defines these as follows: "A portion of the area subject to flooding from the 1% annual chance flood. These areas are not subject to high velocity wave action but are still considered high risk flooding areas." The City's maps indicate in dark blue the "V Zones." These are the "portion of the 1% annual chance floodplain subject to high velocity wave action (a breaking wave 3 feet high or larger)."³

31. Thirty five of the City's 39 existing Manhattan lots that allow adult use establishments are located within the coastal zone boundary. Only four of the Manhattan lots are not in coastal zones: 380 11th Avenue, 400 11th Avenue, 432 West 31st Street, and 442 West 31st Street. While not within the

³ See <https://www1.nyc.gov/site/planning/plans/climate-resiliency-faq.page> (visited March 11, 2019).

coastal zone, they are each located across the street or at most one block from the coastal zone.

32. Twenty two of the 39 Manhattan lots, either completely or partially, are located within the A Zone. Fifteen of the lots are also located, either completely or partially, within the V Zone.

33. Based on my extensive experience as an expert regarding the impact of zoning and other factors on real estate, I believe that virtually no rational business person would invest, enter into long term leases, develop real estate, or take other costly steps to open a bookstore in a known flood zone.

**Localized Concerns Are Extremely
Relevant to Zoning in New York City**

34. Ms. Laremont claims that “[a]ccording to plaintiffs, each borough should be considered separately to determine where permissible adult uses may locate, given that they are different counties.” And, she urges that this “assertion is simply incorrect” because “considerations of where adult establishments may locate must be undertaken on a City-wide basis, as is the case with respect to all uses under zoning.” Laremont Decl. ¶ 13.

35. Ms. Laremont misses my point. I fully recognize the principle of city-wide zoning and acknowledge that planning and zoning for all boroughs of the City is within the responsibility of the Department of City Planning.

36. However, the issue here relates to how speech would fare and whether current zoning provides reasonable alternative locations for the constitutionally protected businesses that will be displaced through enforcement of the 2001 Resolution.

37. That determination -- regarding the effect of the 2001 Resolution on expression -- should consider the vast geographical and other differences between Manhattan and the various boroughs.

38. The City acknowledges this by engaging in this very form of localized consideration in zoning. This is evidenced, in part, through the enactment of special purpose districts to respond to specific concerns of different communities (PJA.1731). The Zoning Resolution creates Special Districts to “preserve and protect the variety of neighborhoods and communities that presently exist which contribute greatly to the livability of New York City.” Z.R. § 103-00. They are also intended to “preserve and protect the character and integrity of these unique communities.” Id.

39. For instance, in 1974, the City established a “Special Clinton District.” In that regard, the Zoning Resolution specifically notes that “[b]ecause of the unique geographical location of the Clinton community, situated between the waterfront on the west and a growing central business district on the east, it is necessary to provide specific programs and regulations which will assure realization of community and city-wide goals.” Z.R. § 96-00.

40. Similarly, the “Special Little Italy District” was established “to preserve and strengthen the historical and cultural character of the community.” Z.R. § 109-00. The “Special East Harlem Corridors District” was created “to encourage and guide the development of East Harlem as a dynamic mixed-use neighborhood by permitting the expansion and development of residential, commercial, community facility and light manufacturing uses in appropriate areas.” Z.R. § 138-00. The District was also intended to “ensure that the form and use of new buildings relates to an enhances neighborhood character and responds to unique neighborhood conditions.” Id.

41. The City created a “Special City Island District”, in part, to maintain the “‘village’ character” and to “promote and strengthen the unique character” of City Island. Z.R. § 112-00. The “Special Governors Island District” recognizes the areas “location in New York Harbor with singular views and natural beauty” and was created to “bring the public to the Island to enjoy cultural events in a unique setting of historic buildings and green spaces.” Z.R. § 134-00. And, the “Special Coney Island District” was established to “preserve, protect and enhance the character of the existing amusement district as the location of the city’s foremost concentration of amusements.”

42. In addition, under the Uniform Land Use Review Procedure (“ULURP”), mandated by the City Charter, residents of one borough have no advisory capacity as to how land use decisions occur in other boroughs. Who is required to review and advise depends upon the scope of the Community Boards impacted by a land use determination. As a consequence, Manhattan residents in both a formal and effective political advisory sense are shut out of decisions in the other boroughs.

Final Thoughts and Observations

43. Ms. Laremont correctly notes that the Zoning Resolution addresses, inter alia, the “height and bulk of buildings and other structures; the areas of yards, courts and other open spaces; the density of population; and the location of trades, industries and buildings designed for specific uses within the City.” Laremont Decl. ¶ 2.

44. The Zoning Resolution has always defined uses and regulated them based upon such objective factors, rather than considering the business practices of a particular type of use or building.

45. The notion of something called an “adult use” was and is a manufactured term of art. It did not exist in the zoning code until the 1990s, three-quarters of a century after the first zoning code ordinance was enacted.

46. From its inception in the mid-1990s down to the present the City has found itself in the position of continuously revising what it exactly meant by an “adult use” in the context of the Zoning Resolution. The differing positions of two representatives of the Department of City Planning -- David Karnovsky and Anita Laremont -- regarding the definition and use group classification of adult bookstores, identified above, brings into sharp focus the imprecision of the City's treatment of these uses and the danger to expression

that this imprecision implies. The difference here is not trivial but rooted in the City's ongoing and ad hoc approach to these uses.

47. To the best of my knowledge, no other types of uses in the entire Zoning Resolution are defined like “adult bookstore”, which considers a store’s “method of operation.” This includes factors such as the titles of books and the manner in which DVDs are displayed within the store (PJA.0049-50) -- rather than traditional land use considerations.

48. The notion of what exactly is an “adult” bookstore has been continually revised since the first attempt at defining it. We are now at a point where the Zoning Resolution actually says a bookstore is an adult bookstore, and subject to closure or strict zoning restrictions, based upon “[o]ther features relating to the configuration and layout or method of operation, as set forth in rules adopted by the Commissioner of Buildings, which the Commissioner has determined render the sale or rental of ‘adult printed or visual material’ a substantial purpose of the business conducted in such store” (PJA.0050).

49. Use group regulation works best the closest it stays to separating incompatible physical land uses from one another. The more zoning is used for purposes of social and moral segregation, the more difficult and complex it becomes to define and regulate away the perceived social harm.

50. For all the foregoing reasons, I urge the Court to grant the relief sought by the Plaintiffs.

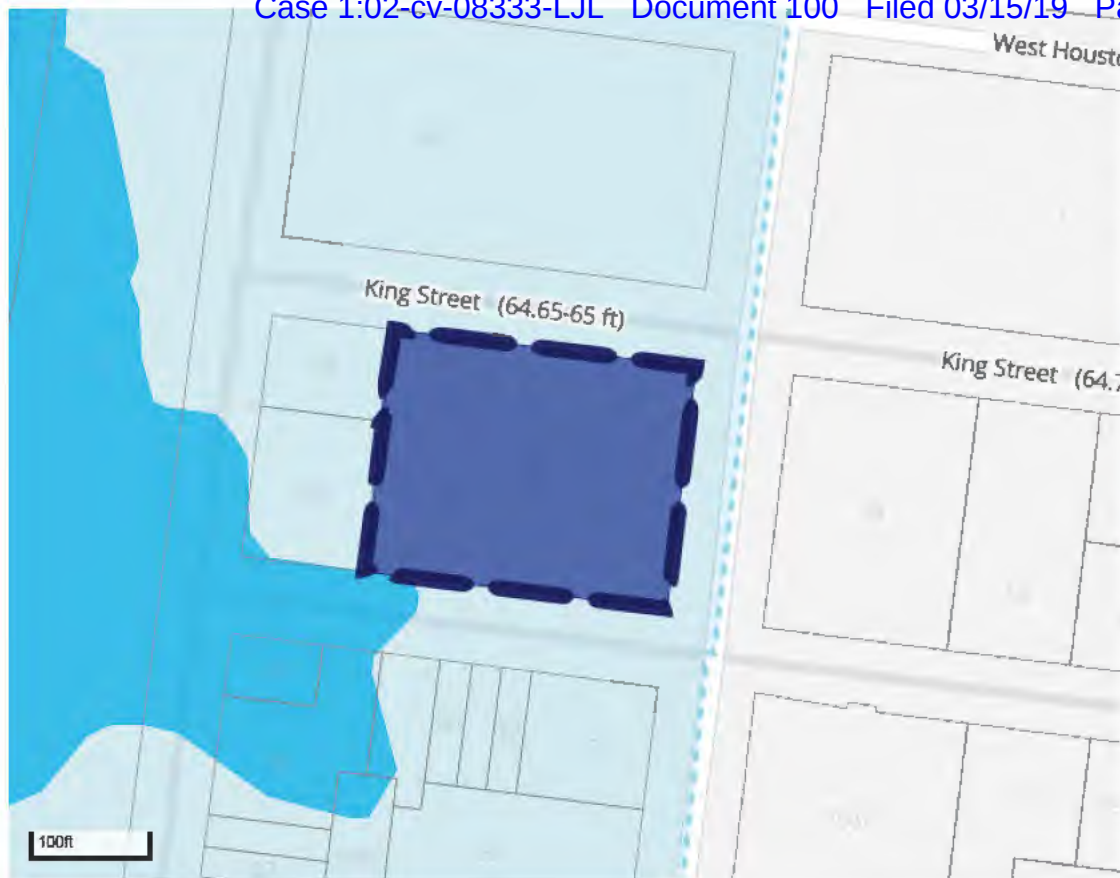

I declare under penalty of perjury that the foregoing is true and correct.
